

Clark Forklift Parts

Clark Forklift Parts - At present, there are over 350,000 Clark forklifts performing globally, and more than 250,000 in commission in North America alone. With five main lines across the world, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift, handles more than 120,000 specific items built for 20 distinctive models of lift trucks and automated equipment. Your regional Clark Dealer is your complete source for availability of all your components needs offered by Clark Totalift.

Clark's exceptional Parts Distribution Facilities are conveniently stationed in Louisville, Kentucky, which serves both their customers and sellers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Motivated to supply the highest level of value and service to our customers, Clark remains on the cutting edge when it comes to enhancing output and benefiting performance.

Globally, Clark has one of the most impressive supplier support networks. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of dedication to their clients predominates the material handling industry.

Clark proudly remains an progressive leader of the industrial equipment industry, pioneering protection features such as the operator restraint system. This exceptional dedication to safety is at this time a standard feature on every lift truck.

Clark's recurrent mission to boast the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck manufacturer across the world to be certified with the internationally approved quality standard ISO 9001 for all of their manufacturing facilities. Also, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any number of environmental restrictions, thus placing them in a prevailing industry position.

Clark has selected the structure of "Lean Production" at all of its assembly facilities because this system is particularly economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient methods for production facility management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working collectively, Clark's product suppliers and engineers communicate towards enhancing product proficiency while minimizing costs. The new value engineering program combines innovative product growth and delivers superior customer support and service within the industry.
