

## JLG Forklift Part

JLG Forklift Part - After retiring in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending many years establishing his family built crane company with his brother, John had no idea that this trip would bring about the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road expedition.

During their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast marketplace for a product that could quickly and safely elevate people in the air to accomplish maintenance and other construction services.

After returning from their vacation, John set up a joint venture with two of his friends and obtained a metal fabricating company in McConnellsburg, Pennsylvania. Starting with a small crew of twenty staff, they produced and sold their first JLG aerial work platform in 1970. The company incorporates many of the basic design elements of that original lift into current versions.

JLG lift trucks have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. These days, the business proudly continues to expand itself into a range of marketplaces worldwide and develops new products to ensure clients are capable of being more efficient and perform in the workplace within a safer atmosphere.
