

Work Platforms

Work Platform - Forklift platforms offer much more flexibility for those who work off of a forklift. These platforms are helpful equipment for the reason that they offer a high level of safety for workers above them as well for the those below. Lift truck platforms are an economical answer for companies since they are a lot more cost efficient as opposed to acquiring specialized equipment. These platforms are even desirable since they can save a lot of storage space. To maximize the benefit and full potential of this equipment, you will need to find the lift that best fits the work tasks you have in mind.

Slip-On platforms are easy to install as all you do is slide them onto the forklift, lock them into position and they are ready to work. Slip-on style accessories have gained enormous popularity in view of the fact that they are quick and easy to operate. They offer an inexpensive solution for businesses that do not require them on a regular basis. These platforms have a railing system in position, tie offs and skid proof decking available. They still require the use of safety equipment by staff but come with these specific features in order to further the safety of people who will be utilizing them. Slip-on work platforms are the perfect choice for such projects which take place in difficult spaces or over top of an object.

A pin system fastens this kind of platform onto your forklift after sliding the platform on. The industrial lift stand offers extra protection since they are equipped with a safety screen in the rear and railings on three sides. For extra safety, it is a good idea to consider choosing a kind which opens through the front railing rather than the side gate unit.

Stock pickers can mount onto a forklift with the same foundations as the other platforms even though they are somewhat different. Stock pickers have a slighter base surrounded by railing on three sides and its protector screen is situated on the front. This model differs from the various platforms in view of the fact that the surface and the cage do not take up the entire fork surface area.

Combination platforms prove very helpful whenever workers need a large amount of materials so as to accomplish a project intended at a tall height. This particular kind of platform has a larger base section and a security screen around a smaller section. This design is vital so that staff could accomplish their job and not have to concern themselves about any supplies sliding onto them if the one operating it tips or tilts the items.

There are numerous accessories offered that could connect to your platform that would improve its effectiveness a lot more. For larger supply stuff like piping, tall racks can be equipped with guardrails. These racks keep supplies like pipes, brooms as well as various stuff from falling off of the platform and hitting other staff. For extra proficiency, there are toolboxes, trays and tools made to mount directly onto the side of the guardrails.
