The U.S. forklift division based in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Advertising, Logistical and Technical Support.

At first the home-based forklift market in Korea was an open import enterprise. Korea Machinery Co. Ltd. begun in 1960, to import fully assembled forklifts as part of a home-based machinery expansion project. Product sales of these products were primarily targeted to state-run companies, large scale corporations, and the armed forces. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to service and sell this heavy equipment. By 1978, a lift truck production plant was successfully completed. Continuous technical education grew to become the new focus for improving quality and product development.

Home-based forklift business for Daewoo started in 1967 and grew to an amazing 90% market share in Korea. By the 1980's, Daewoo's superior technological advancements combined with sales success placed them in a position of significant growth of their forklift business.

Caterpillar Industrial Inc. of the U.S. in 1981, proposed a cooperative venture project to help them in the highly competitive North American materials handling market. This joint-venture proved highly lucrative for Daewoo and their forklift sales expanded greatly. In 1984, the company finished construction of a new facility to help in manufacturing high end value-added products for export. In 1993, the corporation had a global sales network and started exporting versions they had established through in-house expertise, as an sovereign product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing growth possibilities into overseas marketplaces.
